

UPC UNIVERSIDAD
PROVINCIAL
DE CÓRDOBA

Universidad Provincial de Córdoba

A young university, a long standing tradition in the region-

The Provincial University of Córdoba (UPC) was established in 2007 in response to the need for a university institution conceived from Córdoba and for the region, with a critical and transformative perspective. It is an open, inclusive university, integrated into its territory. It is oriented toward collaborative work with multiple sectors and social actors, and toward the construction of knowledge that fosters dialogue between different forms of knowledge.

UPC stands on the strong legacy of Córdoba's prestigious higher education institutes, recognized for their long-standing tradition and excellence across the province and the region. This legacy encompasses key areas such as art and design, education and health, physical education, tourism, environmental studies, business and public management, cultural management training, and now also includes innovative programs in Full Stack Programming and Video Game Production. Building on this solid foundation, UPC offers forward-thinking, high-quality academic programs designed to meet the evolving demands of a global, digital, and culturally rich world.

UPC offers postgraduate, graduate, and undergraduate degree programs designed to respond to the region's needs and opportunities. At the same time, this relatively young institution is steadily strengthening its core functions in research and community engagement. Despite its youth, UPC has already established strong roots and is expanding its presence at both the national and international levels.

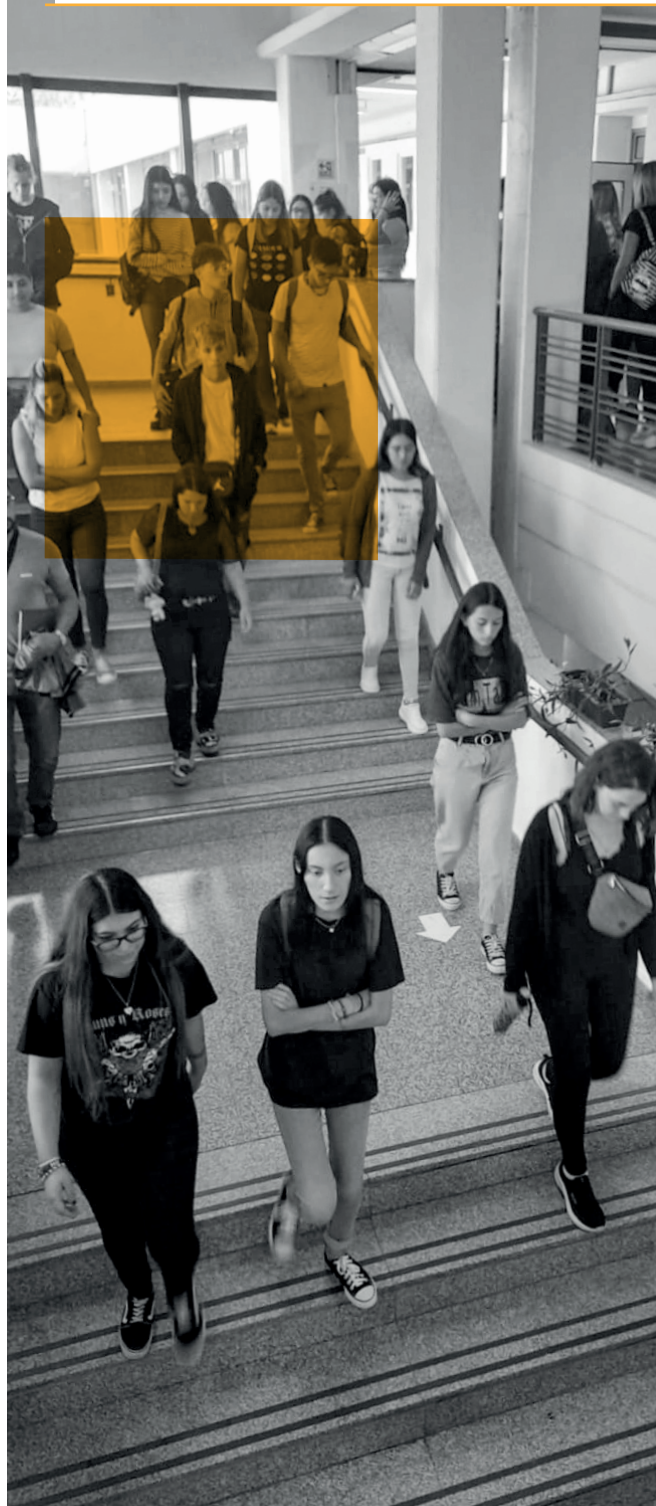

Mission

To provide comprehensive, high-quality academic education that contributes to the social, productive, economic and cultural development of the province of Córdoba and the region. This mission is grounded in strong ethical and humanistic values, and guided by principles of inclusion, equity, social and environmental responsibility.

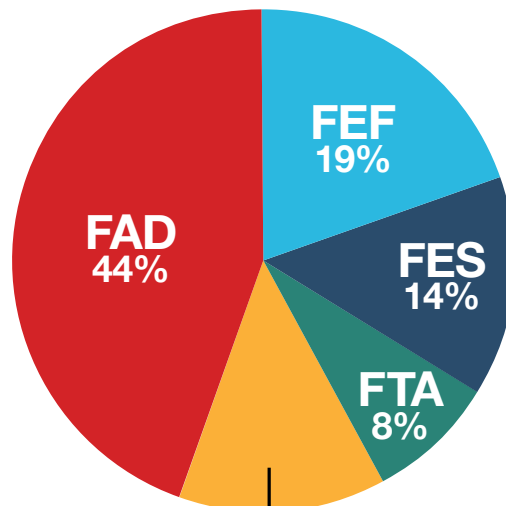

To fulfill this mission, the University prioritizes innovation, social inclusion and articulation and cooperation with different levels of educational systems, as well as with the community and productive sectors. In terms of international cooperation, the University aims at expanding its partnerships with higher education institutions worldwide. This effort is centered on strengthening capacity building through the exchange of knowledge, technologies, and best practices, as well as through the development of joint academic initiatives and student and faculty mobility programs.

Research in 2025

7 Scholarships for the Encouragement of Scientific Vocation (National Inter-University Council or CIN)

26 Research projects (UPC Call for Proposals)

13 Assistant Researchers (National Council for Scientific and Technical Research or CONICET)

7 Targeted Scientific and Technological Research Projects - PICTO (Fund for Scientific and Technological Research or FONCyT)

2 Youth in Science Projects (Science and Technology Office or SeCyT, Córdoba)

+10 Lines of research

- Innovation and productive development.
- State, government and public administration.
- Situated arts and design practices.
- Cultural management. Memory, heritage and cultural assets.
- Social inequalities and human rights.
- Citizenship, engagement, and democracy.
- Education, teaching and technical-vocational training.
- Higher teacher training for school and non-school education.
- Tourism development and innovation, and strategic planning.
- Protected areas, tourism, and local communities.
- Technological innovation in Physical Education and Physical Activity.
- Socio-cultural processes of Physical Education and their regional impact.

Investiga+ Journal

A free-access journal that seeks to advance the dissemination and promotion of research by publishing articles based on theoretical essays or empirical research.

Studying and living in Córdoba:

a great experience is waiting for you!

Founded in 1573, Córdoba is the capital of its province and the second-largest city in Argentina by population, following Buenos Aires.

It is the hub of provincial administration and offers a wide range of services, including eight public and private higher education institutions, advanced healthcare facilities, and diverse industrial and service sectors. Furthermore, the Province of Córdoba is the second most significant in Argentina both demographically and economically. It boasts one of the highest rates of national population growth, establishing it as a central hub for culture, economy, education, finance, and entertainment in the heart of the country.

Córdoba is renowned as a cultural center, often referred to as “Córdoba la Docta” (meaning “the Scholarly”), attracting students from across Argentina, neighboring countries, and around the world. Córdoba is a vibrant city with a significant student population, particularly in the Nueva Córdoba neighborhood, which is close to the historic downtown. The city’s university scene offers a rich array of cultural activities, including shows, art exhibitions, concerts, film screenings, and theatrical performances almost every day and on weekends, contributing to a dynamic student life that is unique in the country. Additionally, within less than an hour from the city, you can explore the distinctive Córdoba mountains and rivers.

The city of Córdoba has been the backdrop for several historically significant events on a national, regional, and global scale. It was the birthplace of the 1918 University Reform, became a major industrial center in the 1930s, and was the site of the Córdoba uprising in 1969. These iconic moments reflect the city's character and national significance, which make its residents proud. In 2000, UNESCO designated the Jesuit Block (located in the historical downtown) as a World Heritage site, making it a must-visit landmark.
